Subject: John Kern's MATLAB files - Follow up to last month's COPC Mapping Meeting
Instructions to Replicate Analysis.docx

Rob,

During our meeting at HDR's office last month, John Kern mentioned that he would provide his MATLAB files for fitting the variograms, including nugget effect. The zip file has been uploaded to SharePoint. The zip file also includes html and pdf output files as well as excel spreadsheets with the pairs used to directly calculate the nugget effect. I have also attached an instruction sheet to replicate the analysis.

http://passaic.sharepointspace.com/members/CPG%20Unassigned/Direct_Nugget_Effect_Calculation_2016_2_

Please let us know if you have any questions or need any help with this.

Thanks,

Jennifer LaPoma
